"MY SOUL HAS BEEN KILLED," SOBBS. BARING IN POISON CASE

SEEKS NO RELENGE ON MATE

Declares "Hideous Disgrace" of Scandal Has Brought the Remaining Days of Life

White Plains, N. Y., May 5.—"My soul has been killed, not my body. It's like being crucified—like being slowly tortured to death."

Mrs. Sallie Baring was sobbing her way to the world for the first time since her husband, C. H. Baring, was arrested charged with trying to poison his wife to death that he must be free to have the "other side" of the law.

Investigation declared that Baring had planned to poison his wife with "Arsenic" in the form of a drink.

Mrs. Baring, who is 45 years of age, was arrested at her home in the Bronx and taken to the New York City Jail.

The indictment against Baring was returned by the grand jury on May 3, charging him with the murder of his wife.

Mrs. Baring, who is a native of New York, was married to C. H. Baring in 1910.

The couple had three children, a son and two daughters.

TO FORCE COUNCIL TO ASK FUND OF CITY COUNCIL IF UTILITIES BOARD DOESN'T ACT

Mayor Curley to Ask Fund of City Council if Utilities Board Doesn't Act

Mayor Curley will ask the City Council for an appropriation to investigate the telephone situation, if the Department of Public Utilities fails to make a similar request to the Legislature.

This statement was made today by Corporation Counsel E. Mark Sullivan at the hearing by the City Council on the telephone situation.

Mr. Sullivan declared the telephone situation should have an intelligent grasp of the fundamental questions of maintenance and operation, which could only be obtained through a thorough investigation.

Mr. Sullivan said: "We have been very generous to the public in the past. The light cases, the appropriations made by the city have run up to \$120,000."

He asked if his request had been considered, and Chairman Henry C. Light said it had not been discussed yet.

PROTEST JUMP IN RATES. Mr. Sullivan said the city of Boston has been paying the telephone company for the use of the telephone system.

He said the city has been paying the telephone company for the use of the telephone system.

Gems Insured Now Only if Worn in Owners' Homes

Chicago, May 5.—Insurance covering jewels worth millions of dollars, owned by Chicago women, has been cancelled by Lloyds of London, it became known here.

The London-based company said that it could not insure jewels unless they were worn in the owners' homes.

Jewels may still be insured but before the risk is taken the agents must ascertain these things:

Is the applicant honest? Is she a resident of the United States? Does she wear jewels in public or in transit?

Is she a widow? If you want your jewels insured, you can wear them in your home with doors locked and double-locked.

STOCKHOLDERS SPLIT 5,000 CASES OF RUM

Washington, May 5.—Legal steps by which the Guinness & Co. stockholders split 5,000 cases of high-grade rum among 125 shareholders.

The stockholders were divided into two groups, one favoring the distribution of the rum and the other favoring the sale of the rum.

GERMANS FOR DAWES PLAN

Socialists Heavy Losers in Election; Ludendorff Is Among the Victors

Berlin, May 5.—A provisional list of deputies chosen in the Reichstag based on latest returns gives the expected coalition of moderates 229 seats. The list follows: Socialists, 99; Communists, 39; Democrats, 25; Centre Party, 61; Bavarian People's Party, 15; German People's Party, 14; German National Party, 29; Extreme National Party, 29; Hanoverians, 3; others, 19.

Berlin, May 5 (I.N.S.).—Gains by Nationalists and Communists, losses of Reichstag seats by Socialists and approval of the Dawes reparation plan were the outstanding features of Sunday's general election, it was revealed by returns today.

Coalition leaders said sufficient deputies favorable to the Dawes plan had been elected to assure official approval of the Dawes plan.

Coalition strength in the Reichstag was jumped from three seats to about sixty.

Senator Wheeler tried to convince the voters to support the Dawes plan.

Dusting of Liberty Bell May Cost City \$3,240

Philadelphia, May 5.—It may cost the city of Philadelphia \$3,240 to dust off the Liberty Bell because Margaret Marter, an employee in Independence Hall, fell and hurt herself while cleaning the bell.

The State Workmen's Compensation Board today awarded Mrs. Marter \$180 a week while she is disabled. The maximum period over which the compensation can be paid is 200 weeks, which would total \$36,000.

Mrs. Marter fell off a stool while dusting the bell. She was struck by another person and then fell.

TUCKERS SAID TO BE ON WAY TO FAR WEST

Boy and His Wife of 49 Can't Be Found North of Boston

The location of the constantly fleeing Tucker family—consisting of a wife, Sarah, Burdette Simpson Tucker, 49, and their son, 14, who is said to be on their way to the Pacific Coast. Once before the principals in this May and December romance have been reported on route for the Pacific Coast. Search among the crowds and crowds of West Gloucester and South Essex failed to reveal a trace of the Tucker family, reported Saturday to be on their way here to visit Mrs. Tucker's mother, Mrs. Sarah Hamilton.

MILLION OF FISH ARE TRAPPED IN CRANBERRY BOG

South Shore Crop Menaced as Herring Swarm in Through Opened Sluice Gate

Pembroke, May 5.—People who the fish can have all they want for the asking by coming to Pembroke. A carcass of a herring was found in the sluice gate leading from Short Brook into the cranberry bog of the United Cape Cod Cranberry Company. Herring, starting to run, followed the sluice into the bog. It is estimated that there are a million of them.

BURGLARS GET 20 CENTS IN FITCHBURG

Fitchburg, May 5.—Although burglars ransacked the office of the Fitchburg Chamber of Commerce on Main street early today and pried the hinges from the door of the safe, all they got for their trouble was 20 cents. Entrance was gained through a broken window. The 20 cents was in a cardboard box on a desk.

100,000 SOUGHT IN "LIGHT WINES" DRIVE

New York, May 5.—A campaign to enroll 100,000 persons in a "light wine and beer" demonstration during the Democratic national convention next month was started here today. It follows the formation of a new organization, the "Light Wines and Beer League of America," which announced it has but one purpose, "to popularize light wines and beer of a reasonable alcoholic content."

KILLED BECAUSE PRIEST IS LATE AT CHRISTENING

Father, Enraged by Delay, Shoots Trustee of Fitchburg Church

Fitchburg, May 5.—A nine-month-old baby soon happily in a house on West Main street, little knowing that he was the innocent cause of the alleged murder of Daniel E. Kozles, five years old of No. 3 West street.

A bride and groom have started on their honeymoon in Wisconsin, too recently engaged in each other to realize the plot they played in that locality that resulted two children being buried in the same grave.

And the priest of the Greek Catholic church, who was also an ex-Church boy, who was also an ex-Church boy, who was also an ex-Church boy.

In the crime, which will be tried in the criminal court, the priest, who was also an ex-Church boy, who was also an ex-Church boy.

Kozles was shot to death on route No. 112, West Main street, the priest, who was also an ex-Church boy, who was also an ex-Church boy.

Today, in District Court, Springfield, the priest, who was also an ex-Church boy, who was also an ex-Church boy.

The shooting occurred during an argument between the two men over the fact that the priest had been late at the christening of a baby in Wisconsin, while guests at the christening home waited for him.

Chinese object to Japs parring them. Tokio, May 5 (AP).—A delegation representing the Chinese Association of Tokio called on Foreign Minister Matsui today and presented a memorial protesting against Japanese restriction of Chinese, declaring that the Chinese expect the same consideration from Japan that Japan is seeking from the United States.

The delegation emphasized that although all of the colored races are interested in the legislation to bar Asiatics from America, it would be unwise for them to stand together while Japan maintained its present restrictions on Chinese immigration.

FATHER JOHN'S MEDICINE. ALL PURE FOOD. For Colds and Throat Troubles. Over Sixty-Eight Years of Success.

CATARRH of nose or throat is made more endurable, sometimes greatly benefited by applying Vicks up nostrils. Also melt some, and inhale the vapors.

VICKS VAPORUB. Over 17 Million Jars Used Yearly.

Marry Me, Mollie, and I'll Buy the Ring. Does Your Watch Perform Properly? 75c. 3.00. 5.00. 15.00. 25.00.

BIBLE CONTEST PRIZES

Does the World Need a New Bible? Are "The Ten Commandments" Sufficient?

Answers limited to 200 words. Address Contest Editor, Boston American

First Prize, Best Answer \$25. Five 2d Prizes \$10 each. 10 3d Prizes \$5 each. 20 4th Prizes—Two Best Sets for "THE TEN COMMANDMENTS" at the Tremont Theatre.

20 5th Prizes—Two Sets—Choice of Attractions at the Tremont, Colonial and Selwyn Theatres.

The American will publish selections from all the best answers.

WRITE NOW—CONTEST CLOSES SATURDAY, MAY 10.

DO YOU THINK THE WORLD NEEDS A NEW BIBLE?

Are you "up on your Bible?" What do you think of it? What do you think of the Ten Commandments of God? Are they complete? Are they modern?

Think these questions over. Modest—some of them—question the Bible and deny the Ten Commandments. The call is for a revision.

The American often offers prizes for answers on two questions in this regard. The questions are: "Does the World Need a New Bible?" and "Are the Ten Commandments Sufficient?"

ANSWERS POURING IN. Five more days—excluding today—remain to send in your answers. The contest will close May 10. From over the New England answers of readers, vastly interested, are pouring in. Here is one of them from Mrs. Grace L. Spring, No. 124 Foster street, Boston:

"I do not believe we need a new Bible. I believe we need both the Bible and the Ten Commandments."

"If everyone kept the Ten Commandments to the best of his ability, we could abolish capital punishment, prisons and insane asylums, even reduce our hospitals and orphanages—neither would there be any wars."

NEED FOR BIBLE. "Assuredly we need the Bible and should have it in every home. We should teach Bible history in our schools."

Following is an excerpt from another letter, by Daniel G. Hitchcock, No. 1 High street, Warren:

"Certainly we need a new Bible. Independent of new translations, there are many modern writings containing more of helpful inspiration than some things in the Bible as it is."

"As for the Ten Commandments, which these authorities, every child knows they are largely negative, to be supplemented by love to God and man. Division is in order."

Even a ten-year-old child, Emel Muma of No. 56 Chestnut street, Chelsea, has entered the contest. Here is Emel's letter:

"We need a new Bible because the Bible is so old. I am ten years old in the Williams school, sixth grade."

From Mrs. Minnie Lessor of No. 74 Morton street, Dorchester, comes the following answer:

"I would suggest that the Ten Commandments be framed in four different languages—English, French, Italian and German. The framed Commandments should be hung in the best room of every house, also in factories and business houses. The children should be taught in the morning and evening."

These are samples of the letters pouring in. Send yours.

WATCHED PAIR FROM ROOF; ARREST BOTH. Mrs. Marion Holt, twenty-four of No. 161 Warren street, Brighton, and George Sheehy, twenty-four of No. 25 Nehalem street, Weymouth, arrested after police had watched an apartment at No. 150 Commonwealth avenue for four hours, were before Judge Connolly in Brighton Court today. They pleaded not guilty and the case was continued until Saturday.

Acting on information furnished by the woman's husband, Herman Holt, Special Officer James Flinn and Patrolman LaRochelle, from St. Petersburg, Fla., has been sent to Santa Clara province for investigation of charges that he conspired with the Cuban veterans and patriots in the recent outbreak. It was announced today.

They are held as plotters. Luis Guillermo Gills, arrested in Lima on his arrival from St. Petersburg, Fla., has been sent to Santa Clara province for investigation of charges that he conspired with the Cuban veterans and patriots in the recent outbreak. It was announced today.

Forty-six Lose Lives. London, May 5 (H.N.S.).—Forty-six persons were killed and villages demolished in the Harard district of India by a hurricane.

When realized on Swift & Company ship of 1000 tons left for Boston for the purpose of carrying 1000 tons of coal. The ship was damaged by a hurricane and 400 tons of coal were lost. The ship was damaged by a hurricane and 400 tons of coal were lost.

SEIZE CUBANS IN FLORIDA AS 'PLOTTERS'

Trio Who Came to U. S. to Learn Flying Held as Result of Island Revolt

Ocala, Fla., May 5.—At the request of the Federal government, Sheriff Thomas today arrested three Cubans who came here to learn flying before marrying Holt. She said she was "expanding the wing-end" at the apartment when arrested.

They are held as plotters. Luis Guillermo Gills, arrested in Lima on his arrival from St. Petersburg, Fla., has been sent to Santa Clara province for investigation of charges that he conspired with the Cuban veterans and patriots in the recent outbreak. It was announced today.

Go Easy on Expensive Stockings, Girls; You May Not Need Any

New York, May 5.—Girls be careful buying your stockings this Summer. There are signs that Dame Fashion may eliminate them altogether this Summer. At least, the stockings maid, has appeared in public.

Indefatigable the gold winds and cawness of the air, she visited Queen Mary, promulgated up and down the big broad wings, to the edification of the throngs, policemen and all.

She was tall, slender, very pretty and oblivious of the sensation she had created.

of her struggle to make her living, of her marriage and the further struggle to live on \$30 a week, which divided her and her husband to take up banditry, of their first raid that netted them \$500.

Today, considering her exclamation, she told of their second raid, which netted them only \$100.

The first raid from came when, the following morning, she read that the police had been ordered to "shoot to kill" and she told her husband the police had no right to do such a thing.

The American newsman's her was rather, not only for the inherent interest in the amazing inside details of her experiences and mental maneuvers but also for the lesson in confidence that in the end crime can never pay.

By CECILIA COONEY.
The Bobbed Bandit.
CHAPTER VI.

It was our second robbery that really made the big stir and got the

police excited and got the whole New York police chasing us. Nothing much happened after the first holding. Ed brought home the newspapers and we read about it, but it was only a little piece. Hagen, that's the Ralston grocery store manager, had phoned the police after we got away and they went out there, but the detectives wouldn't believe a girl had done it—said it must have been a man dressed up in a girl's clothes, and sort of let it go at that.

But, believe me, it broke different after that second Saturday night. That was January 12—the night we went out and stuck up two stores. We cruised around a bit looking in windows, and before I knew Ed had made up his mind. He said, "What's that?" and I told him I was going to the A. & B. chain store at 411 Fifth Avenue, and we left the car at the curb, with the engine running warm, before only this time we went in together.

Ed stopped just inside the door while I went up to the counter. This time I was bold. I hardly even noticed that there was a man and his wife in there, besides the four

clerks. A Mr. and Mrs. Gibson or Gibbons, I heard afterward, that's all I can remember. Ed had said, "You make it snappy!"

So I walked up to the man nearest the cash register—that's nearly always the manager because he has to make the change for all the rest—and said, "Give me a dozen eggs." It's funny, how they don't ever suspect a thing. Hardly look at you, except to say, "Anything else, please?" And then wrap it up and push it over the counter. This man was sort of absent-minded. I remember. Looked like he was worrying about something, but it couldn't have been bandits, for when I showed him the gun in his face and said sort of low, "Stick 'em up and be quiet," he jumped like he'd already been shot, and first turned red and then white as a sheet.

Ed was behind me, covering the store with his two guns. And quick as he saw there was going to be no trouble from the manager—he told me that if there was ever a pistol in the store it would be the manager who had it, he called out, "Get to the back, all of you, and turn your faces to the wall."

That Mrs. Gibbons, or Gibson, or whatever it was, I heard afterward, was dead. I don't know. I guess maybe she must have been a little bit dumb, too, for she just stood, and didn't seem to trouble to what was happening. She just looked at her husband, and put her hand to her ear, and said, "They, what is it? What do they want?"

And he said, "My God, they're robbers, don't you understand! Put your hands up like they tell you or I'll shoot you dead!" And she said, "Oh!" And he already had his hands up.

Do you know, that lady never did put up her hands. I guess maybe she wasn't so dumb after all. I shouldn't ought to have said that about her, anyway. She stuck her

chin in the air, and what do you think she said?

She said, "Well, it's plain this is no place for me. I'll never trade at this store again. Come on, John."

And didn't she start to walk right past me? Ed out of the door?

I thought for a second Ed was going to let her go. He dropped both his guns so that they pointed right down to the floor. And then I guess he lost his temper a little bit, because he yelled:

"Lady, won't you please get to the back? This ain't a joke. Beat it now to the back!"

She went to the back, and stood beside her husband, but she took her time about it, grumbling and mumbling something about it oughtn't to be permitted and where was the police?

Well, once they were all in the back it sounds long to tell, but it didn't last long. I had more than a couple of minutes—I held the gun on them, and Ed got the money out of the cash register.

Less Than \$100

When we got back out in the car and had turned a couple of corners, Ed showed me a little and said, "Kid, we didn't get much that time—less than a hundred dollars. It looked like to me. We got plenty of time and everything's set. Let's try another."

I said, "Sure?" It was getting to be like fun, and didn't seem to be much danger. So we cruised around some more, and got on Brooklyn Avenue and passed Ed's grocery store, and pulled the same thing there. There was a couple of men, two clerks, but they went to the back just like the clerks did, and nobody made any trouble. I thought, "Gee! This don't amount to so much after all. It's like any other work, except that it's a little better, but where's the excitement?"

We got more money there—around \$225, I think—and next morning I found out where the excitement was. I was all right, but I was a little bit dizzy, and I slipped on an apron over my nightgown and made some coffee and boiled some eggs, and while I was doing it, Ed went out and brought back a stack of Sunday papers. He threw 'em on the bed, and we had our breakfast while we looked at the colored funny pages.

Ed went back in the bedroom while I was cleaning up, and all of a sudden I heard him call:

"Great crimes, come here and look what they've done!"

There in was were two or three of the papers all spread out at their front pages, and snored all the way across the top of the page in letters so big that they would knock you for a goal, was "Bobbed-Bandit Terrorizes Brooklyn."

And "Pretty Girl Robber Told—Terrorizes a lot more of our people. I stuff that I can't remember."

I felt big.

And, gee! what they said about me. We had have ever thought that little Cecilia Cooney, working in a laundry at \$12 a week—would be all over the front pages of the newspapers like that! Gee! I felt big!

I didn't see why I felt big! I was still bent over the papers. Then, all of a sudden, I sort of figured it out and I went back to a thing about him in the headlines, and only down in the small type, they spoke of him once or twice as a "mild commiseration." And once they called him a "confederate."

Anyway, I thought Ed was more, because the papers had sort of left him out and I started to tell him about it.

He said, "Aw, Cella, cut it. You don't seem to understand what we've been doing. Look here."

And he showed me a place in the newspaper where it said the police had given orders to shoot and kill on sight.

I said, "Why, Ed, that's awful. You don't think they mean it, do you?" They haven't got any right. They wouldn't do that, would they?"

He said, "Well, Cella, they have done it—with others. I guess they've got the right, all right."

I sit here in this cell now and think about it, and I can't see how I had the nerve to have kept on going after that—for do you know it wasn't but three days later that we, Ed and I, went out and robbed Weinstein's drug store.

Women Deserve the Best

by The Veteran Motorist

TO my mind one of the principal reasons why we see more and more women motorists on the road is the fact that Socony Gasoline and Socony Motor Oil have largely eliminated the engine troubles and breakdowns that formerly were only too common to automobiling.

In quite a personal sense, I take pride in this fact—that the uniform quality of both Socony Gasoline and Socony Motor Oil has contributed to making motoring both safer and more pleasurable. In addition, at both company stations and garage locations a standard of service which includes courtesy, helpfulness and a constant willingness to serve the motoring public has been deliberately created and maintained.

That's why, in my opinion, more and more women motorists are driving their own cars every year. They have come to realize that Socony Gasoline and Motor Oil are the best, that anywhere and everywhere along the highway the familiar red pump is a symbol of service and courtesy.

Four telegraph news services in the Boston American—the news while it is news and not history.

Blondes and Brunettes

Color of Young Woman's Hair Has Little to Do With Mentality

Investigation sometimes develops strange things. An electrical manufacturing concern in Chicago, advertising for girls to operate machines in their factory, announced "only brunettes need apply."

A wide-awake city editor wanted to know "WHY?" The manager said that he had had a lot of experience with girls and found that "a blonde-haired girl doesn't seem satisfied unless she is moving around all the time. I believe blondes are fickle by nature."

Very valuable to know, if it is true. Probably not true. There has always been a good deal of friction between blondes and brunettes. Men have usually been to blame. They almost always are when there is any trouble between women.

It has never been demonstrated that the color of the hair has anything to do with the efficiency of the individual. The fair-haired races of the world, where even brown hair is rare, are quite as efficient as these nations where, as in Spain, 75 per cent are brunettes. As a matter of fact there was a time when the whole human race was blonde to the extent of being red-haired, for primal man, man just growing from the ape into the human, was clad all over with a coat of red fur. The orang-outang, the highest of the ape species living today, and which has hair like a human being and not wool, is almost without exception red-haired.

The color of the hair varies most in those races where the hair is wavy. Among these peoples the wool-headed covering it is almost invariably black. Among the straight-haired races, like the Indians and the Orientals, it is never light colored. The discovery of a blonde race of Esquimaux was looked upon as extraordinary.

The real thing that determines a young woman's worth in any of life's endeavors is not what color of hair she has on the outside of her skull, but the kind of brain she has inside it.

Never mind whether you are blonde or brunette. If you are in earnest about your work, if you are bound to make good, if you are hunting success and determined to find it, the color of your hair will not make the slightest difference to you or to anybody else.

The second and more important result of investigation is that a one-armed soldier makes the very best kind of an elevator operator.

This was determined by a man who not long ago settled a claim for damages when a passenger was injured because the elevator was started before the door was closed. A one-armed soldier applied for a job and the man, after thinking about it, decided that man would HAVE to close the elevator door before he started up or down, because, having only one hand, he would have to finish one thing before he could begin another.

It worked out just as he thought it would and the soldier kept the job.

This is a valuable lesson. There are a good many places where men crippled in the war will find work to which they are admirably fitted.

The Metric System

A Good Thing, but It Is Probably a Long Way Off

The metric system would do for us in our weight and measures what the decimal system does for us now in money.

Each of us knows how much better it is to have a dollar divided into one hundred cents than to have something like the English pound, with its shillings, pence and ha-pence. The metric system, which is the decimal system under another name, saves time.

It would save as much time in weights and measures as it does in money.

But those of us that are grown up KNOW and understand our present old-fashioned, stupid system. We do not know the metric system.

And being grown up, and having control, we do not want the trouble of LEARNING.

If the next generation could make laws, we should have the metric system tomorrow, for it would save the next generation time and trouble.

But, dull and reluctant to learn as we are, the metric system will probably wait until the next generation, and then perhaps until the next.

Big Crooks Favored

America likes to do everything on a big scale; everything except prosecuting the big-scale crooks.

An oil promoter is on trial for rigging the stock market, last Wednesday, in an attempt to boost a stock from seven to thirty-two dollars a share.

It is charged that sixteen hundred shares were sold at thirty-two dollars. Some of the shares went to the public; most of them were "wash sales" made between agents of the promoter in the attempt to establish a high price for the stock. If they convict this little swindler, he will get a fine up to five thousand dollars and imprisonment up to two years, or both.

Meanwhile, unless history repeats itself and all signs fail, the big crooks in Washington and the business world, who swindled the Navy out of its irreplaceable oil reserves, are likely to go free. Their guilt will be buried beneath the mass of irrelevant testimony in Washington investigations, and their prosecutions strung along interminably by the ingenuity of their high-priced lawyers and the devious ways of the American law.

Stranger Than Fiction

The facts, especially the facts about radio, are stranger than fiction.

A man, locked in a bank vault enclosed in thick walls of steel, hears songs and catches from miles distant by radio. Deep down below the surface of the Hudson River, through thirty feet of water and fifty feet of mud, concrete and iron, tunnel diggers hear messages from Pittsburgh.

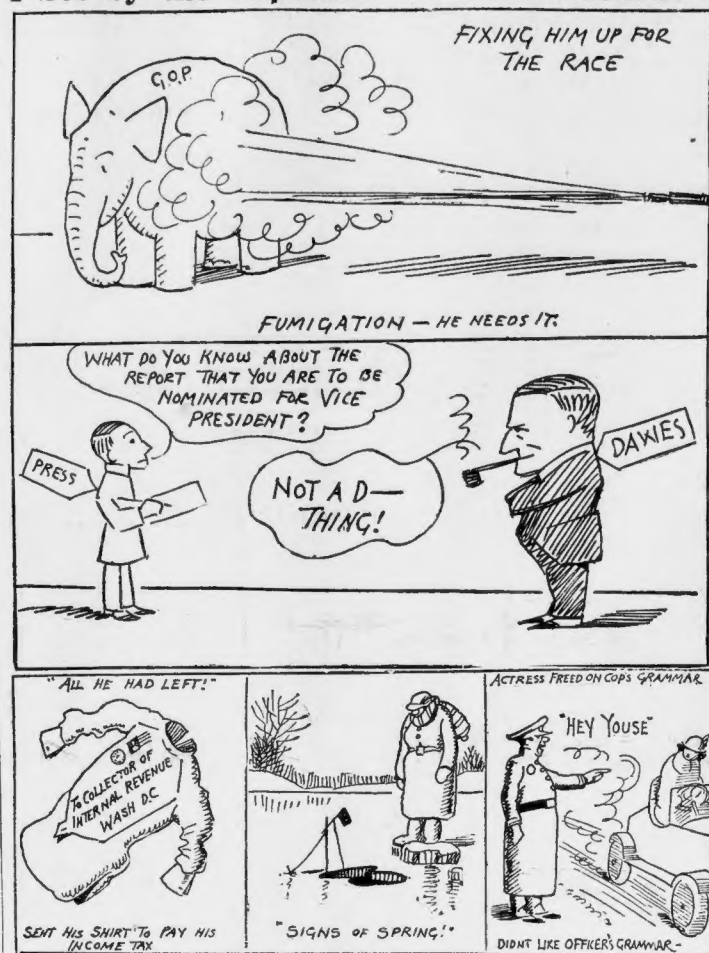

If there is anything in Grimm's fairy tales more unbelievable than this we do not recall it.

I See by the Papers

By T. E. Powers

A WIFE'S MEDITATIONS

By HELEN ROWLAND

IF a man would explain half the darnings in pursuing a girl that he does in chasing an old straw hat, life would be so much more thrilling.

When a man hasn't got the nerve or the grace to give his girl a "Mistakenly" character, he begins to brag about it.

Every man loves a "colander" who—if she will only LET GO occasionally!

It's what you see in a man that makes you fall in love with him—but it's what you can overlook in him that helps you keep that way.

Many a bachelor would gladly marry, if he could only love one girl long enough to get as far as

"Putting" is the longest way around matrimony. Why would a man hunger and thirst after a man, when he is already "fed-up" on marriage?

Sometimes, a bachelor feels that by remaining a BACHELOR he will remain an eternal temptation.

Not until she feels her hair does a woman realize how many things she can do with a hairpin (Copyright, 1924, King Features Synd., Inc.)

THE RHYMING OPTIMIST

By Aline Michaels

DOWN town city streets the spring-time days can work but little change, the air of April with their main seems somewhat cold and strange. No flower darts to blossom there amid the brick and stone, and on the breath of smoke-filled air no fragrant scent is blown. By chance the passerby may see, hid in some courtyard grass, a daisy, and, and twisted tree among the shadows dim, that all its leaves are small and pale, they silver one by one as from the cool spring wind they quail and never plume the sun. Pay off, down quiet village ways the tall trees bloom and bud, the South wind lingers as it stirs, spring tide is at the flood; For April decks the little towns in rosiest bloom and gay, when with her fleeting

Needs Baby Carriage
Editor Helping Hand:
I wonder if some of your kind readers would give me a baby carriage? My baby is two years old, and I have a little fellow in the hospital four years old. He is coming home tomorrow. He had pneumonia and will need lots of fresh air. He is not much bigger than the two-year-old, and I would like to get a carriage big enough for the two of them, as I can't take one out without the other. I can't buy a carriage, as my husband is only working one and two days a week and I have six children and it takes every cent to feed them. I have read lots of times where you have had carriages, so I hope I will be lucky enough to get one.

Offers Two Pet Cats
Editor Helping Hand:
As you have done me several favors in the past, I am writing again. I have two pet cats that I wish to give to someone without children. One is a beautiful tiger cat, and the other is a very affectionate black and white cat. They are both smart and good, clean and healthy. I will take them to anyone who will care for them, or the person may call at my house.

The Editor's Thanks
The editor wishes to express her appreciation to the following people for their generous offer of assistance to those in need. They have been sent the address requested:

DR. FRANK CRANE ON SEAM OF DREAMS

By DR. FRANK CRANE

WHAT makes marriage complex and difficult is that it is not merely the union of men and women so that "they twain become one flesh."

The physical union alone is quite simple. It is natural, instinctive, emotional and, considered by itself alone, it is likely to be but temporary. That is, the physical impulse which draws two people together is not always permanent.

The matter becomes complex when we consider that human beings are souls of spirits.

Where there is a fitness between the spirit of the man and the spirit of the woman there is, at least, a possibility of permanence.

Two spirits may increase in mutual affection, in harmony and in dependence with the increase of experience and with the decay of faculties.

Marriage, physically considered, is a matter of youth; spiritually considered, it is a matter of a lifetime, perhaps of eternity.

And the trouble is that the two dreams are often of such nature that they cannot be sewed together.

The woman's dream may be of social prominence, society and the like; while the man's may be of business success, tempered with trivial relaxation. The attempt of these two to hold together is like trying to sew calico on to velvet.

The woman may dream of music, art, literature and of such city refinements; while the man's dream may be all of outdoors; hunting and fishing. And how can silk be sewed to cotton?

The man may have a New England conscience and the woman a cabaret consciousness. The man's dream may be only of a life of ease; slippers and comfort, while the woman's dream may be of hustling activity.

The man's dream may be of a life where the male is lord and chief and the female simply his handmaiden and servant; while her dream may be of intellectual companionship, equality and independence.

In these cases it is no wonder that the garment of marriage gives way. The seam of dreams will not hold.

The real mesalliance is not where one is rich and the other is poor, nor where one is vulgar and the other is aristocratic, nor where one is low born and the other is of high degree.

If, in these cases, both parties have the same dreams they may possibly manage.

But the disastrous mesalliance is where one soul is dreaming toward the East and the other toward the West, where their dreams are not of the same material and there is a fatal difference in fabric.

For marriage is a seam of dreams.

GARRETT P. SERVISS ON MEASURING VEGA

By Garrett P. Serviss

Famous Astronomer and Writer on Scientific Topics of Popular Interest

AT the Allegheny Observatory they have been measuring the parallax of the brilliant blue-white star Vega, in the constellation Lyra, one of the brightest and most beautiful stellar objects in all the heavens, and a splendid ornament of the northern sky in the Summer time.

Years ago the astronomers of the Allegheny Observatory, when viewed with a telescope is a rich rush of vivid blue which seems to stain the air around it, pulsating core of white fire that forms the central image of the great star.

The new parallax measure does not differ greatly from earlier ones, but has a smaller probable error, and serves to give assurance that we now know the distance of this remarkable star with considerable accuracy.

The parallax is 0.117 of a second of arc. This corresponds with a distance about 1,782,000 times greater than the distance between the sun and the earth, which is, itself, 93,000,000 miles. Light waves must require nearly thirty years to come to us from Vega.

Knowing the distance of the star with a light, by direct observation, we can estimate its actual size, which the earth and moon are seen from.

With Vega given about forty times as much light as the sun; but the sun is far away. Vega is about 1,782,000 times as far away as the sun.

It is interesting to remember that Vega is singular among the bright stars, in that it lies not far from the direct line of the sun's great and mysterious journey through interstellar space—a journey which the earth and the other planets are compelled to share with their solar master.

It is about 376,000 miles per second. But Vega is not standing still, and the sun will probably never meet it.

LIVE UP TO THE FAITH OF YOUR CHILDREN

One of the reasons why so many children are not more impressed with religion is that their parents, who may profess to be Christians, so frequently in their homes violate the principles of Christianity.

It stands to reason that a child whose parents pretend to be the world that they are Christians, and who quarrel and talk in a degrading manner about their own sins, and who make their children feel like they are in a Christian manner, will have little faith in Christianity.

If a child loses faith in Christianity, in Christians in general, because of his parents, why so many children are not more impressed with religion is that their parents, who may profess to be Christians, so frequently in their homes violate the principles of Christianity.

It is a truly awful thing to destroy the faith of a little child. A man who turns his eyes to God in prayer and the next moment expresses his anger about his sins, makes just the opposite impression from the one he seeks to put over.
